

Notice to Customer

Service Line Inventory Sign Up

Due to **State Regulations**, municipalities around Vermont are conducting and required to complete a “**Service Line Inventory**” for **ALL** connections by **October, 2024**.

What does this **mean for you**, the customer?

Help us out and **schedule a date today!**

This simply means calling and setting up a date for us to enter your residence receiving service. Then we will document the line material coming into the residence, and document the material plumbed inside the residence.

Each appointment should only take around 5-10 minutes.

There will be five appointment windows per day (9am-3pm / Mon-Fri)

To Schedule an appointment call

Zack Letourneau @ 802-673-2542 / Andrew Vera @ 802-323-6080

Any customer who doesn't reach out will be contacted by the water department, however, we ask that you call and schedule a window at your convenience – Thank You
